Why use hSenid for Outsourcing ?

Businesses today need highly functional, high-performance applications in order to remain competitive. Billions are spent each year by firms to upgrade existing systems or develop new systems. However, the high cost of in-house software development makes such efforts prohibitive to many businesses.

hSenid can make high-performance applications available and affordable without physically being in your office.

Some of the benefits you will receive are as follows:

- ▶ Additional staff without having to provide office space or equipment.
- ▶ No travel, relocation or temporary housing expenses, no insurances, vacancies or sick leave expenses.
- ▶ Main advantages of the "telecommute programming" by hSenid's software developers are professional quality due to very high skills and traditionally reasonable rates of pay. With us you save over 60 % of your development costs.

hSenid's development skills are packaged as development partnerships. Partnerships can include short-term and long-term projects, partial or complete life-cycle services, analysis and specification design, coding, maintenance and specific subcontracting services.

hSenid engineers and consultants are experienced with back-end and front-end Mobile applications, Technologies and Frameworks including Java, Microsoft and Open-Source. Operating systems experience includes Windows and Unix varieties, WinCE and Palm OS. Database experience includes Oracle, MySQL, MSSQL and DB2.

Benefits:

- ▶ Reduce development costs.
- ▶ We can absorb costs associated with recruiting, training, outfitting, paying, motivating and most importantly retaining software developers.
- ▶ Meet tight deadlines and/or reduce application backlog.
- ▶ Immediate access to developers.
- ▶ Free internal programming staff for core business projects.
- ▶ Our developers will focus on resource-intensive development phases of coding, Q/A and maintenance.
- ▶ React quickly to market and competitive pressures.
- ▶ Research new product requirements and develop product concepts.
- ▶ 24 / 7 / 365 uninterrupted support service which caters to all customer inquiries and problems.

DEVELOPMENT METHODOLOGIES

*Test First Development
Automated Testing
Re-factoring
Software design patterns
High frequency builds*

PLATFORMS SUPPORTED

Operating Systems:

*Solaris
Linux
Windows
Unix*

Databases:

*MySQL
Oracle
MSSQL
DB2*
